

“With a joint replacement program ranked among
the top 5% in the nation,
it’s clear why people prefer Bronson.”

*Bernard Roehr, MD – Midwest Orthopedic Surgery
Bronson Methodist Hospital Vice Chief of Staff*

At Bronson, we perform orthopedic surgery in new ways, using less invasive technology that results in smaller incisions, less pain and faster healing times.

And with a unit dedicated solely to orthopedics, our joint replacement patients benefit from specialized staff, all-private rooms, and a care and rehabilitation plan designed to meet their individual needs.

That’s one reason our joint replacement program is recognized as one of the top 5% in the nation, according to HealthGrades® and why more people prefer Bronson for orthopedic surgery.

Don’t let hip or knee pain slow you down.
